

Alterations Recommendations

- On average, standard wedding gown alterations start at **approximately \$400-\$800**. Customizations may cost more. Final cost will be dependent on the seamstress and the work needed to be done.
- The ideal time frame for alterations is 2-3 months. Start researching seamstresses and booking your fittings as soon as you have an estimated arrival time for your gown (provided by your stylist approximately 1-2 weeks after order date). **Please schedule ASAP if you will have less than 2 months for alterations.**
- It is extremely important that you feel confident and comfortable with the seamstress you choose. When choosing who to work with, ask for referrals from wedding professionals, friends and family. Read reviews and discuss your desires and expectations with the seamstress before booking.
- Charlotte's is not responsible for any alteration conflicts or issues. If, for some reason, you are unhappy with your alterations please discuss with your seamstress.
